AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS

- 1-27. (Cancelled).
28. (New) A system that acquires information, comprising:
a search component that utilizes search terms identified from a transmitted signal to retrieve related results; and
a output component that presents the results with the transmitted signal.
29. (New) The system of claim 28, the transmitted signal is a television broadcast.
30. (New) The system of claim 28, the transmitted signal is an audio signal.
31. (New) The system of claim 28, the transmitted signal is an image.
32. (New) The system of claim 28, the transmitted signal is a radio broadcast.
33. (New) The system of claim 28, the transmitted signal is a video.
34. (New) The system of claim 28, the transmitted signal is a text layover from a movie.
35. (New) The system of claim 28, further comprising a search term generator that determines the search terms from the transmitted signal.

10/828,587

MS141394.02

36. (New) The system of claim 35, the search term generator decodes the transmitted signal and extracts the search terms from the decoded signal.

37. (New) The system of claim 36, the decoded signal is formatted as ASCII text.

38. (New) The system of claim 36, the search term generator decodes the transmitted signal *via* an ATI All-in-wonder tuner system.

39. (New) The system of claim 28, the output component streams the results to a user.

40. (New) The system of claim 28, the output component stores the results and the transmitted signal.

41. (New) The system of claim 28, the results comprise uniform resource locators (URLs).

42. (New) The system of claim 28, further comprising a storage component that stores a predetermined number of results and deletes aged results as new results are obtained.

43. (New) The system of claim 28, further comprising an information presentation component that displays information associated with the results, the results are selectable such that a selected result causes information corresponding to the result to be displayed.

44. (New) The system of claim 43, the transmitted signal, the results, and the information associated with the results are presented concurrently.

10/828,587

MS141394.02

45. (New) The system of claim 28, further comprising a filter that limits the results.

46. (New) A graphical user interface, comprising:
a broadcast window that displays a communication signal;
a search results window that displays selectable search results that are determined from the communication signal; and
a content window that displays information associated with a selected search result.

47. (New) The graphical user interface of claim 46, further comprising a closed caption window that presents closed caption text associated with the communication signal, the closed caption text is employed to identify the selectable search results.

48. (New) The graphical user interface of claim 46, the broadcast window, the search results window and the content window are presented upon a display of one device.

49. (New) The graphical user interface of claim 46, at least one of the broadcast window, the search results window and the content window is presented upon a display associated with a device, and a different at least one of the broadcast window, the search results window and the content window is presented upon a disparate display of a disparate device.

50. (New) A method for obtaining related information, comprising:
determining search terms associated with a transmitted signal;
performing a search to yield relevant results associated with the transmitted signal utilizing the search terms; and
presenting the results with the transmitted signal.

MS141394.02

-
51. (New) The method of claim 50, further comprising selecting a result to obtain information associated with the result.
52. (New) The method of claim 51, the information associated with the result is a webpage.
53. (New) The method of claim 50, further comprising presenting the results and the transmitted signal upon disparate display devices.
54. (New) The method of claim 50, further comprising filtering the results to focus a search.
55. (New) The method of claim 50, further comprising presenting a predetermined number of results.
56. (New) The method of claim 55, further comprising deleting aged results as new results are obtained.
57. (New) The method of claim 50, further comprising streaming the results to a user.
